

# WATER DATA COLLABORATIVE

## Steering Committee Member

The Water Data Collaborative (WDC) is a coalition of environmental organizations committed to the advancement and growth of community water science. The WDC's mission is to grow and maintain an inclusive community of trained and qualified community water scientists who employ best available practices and technologies to provide data that enable the protection and restoration of our nation's waterways.

The Water Data Collaborative's Steering Committee is composed of members from the water monitoring community and exists to provide advice and direction on WDC's programs, business, and initiatives. Steering Committee members serve voluntarily and act as representatives of their "parent" organization on the committee. Steering Committee terms are three (3) years with the option to serve two terms. Members can recuse themselves from the Steering Committee at any time.

### MEMBER DUTIES:

- Attend monthly 90-minute Steering Committee meetings held on the last Tuesday of the month;
- Attend the annual Steering Committee meeting held each December;
- Become informed and subscribe to WDC values and keep up-to-date on the programs, finances, and management of the Collaborative as a whole;
- Assist in the development of foundational documents, including the strategic plan, annual WDC priorities, and funding proposals
- Be a WDC ambassador, promoting our services to your individual networks, as well as to potential funders and new Steering Committee members.

If interested in serving on the Steering Committee please contact the WDC Coordinator
